I. GENERAL INFORMATION

Activity: **Balik Scientist Sagada Cultural and Educational Tour**

Date & Time of Activity: July 13, 2023

Venue of Activity: Sagada, Mountain Province

Facilitators: RDE Staff

Participants: RDE Staff/Personnel, Balik-Scientist

Budget: Php

Source of Fund: Research Fund -

II. RATIONALE

Balik- Scientist Program is a program of DOST which aims to promote research mentoring and partnership with expert in the field or scientists with SUCs and private HEIs to promote the development of research capacitation in institution who wishes to tap Balik- Scientist individuals. In other words, it was created to promote knowledge sharing. Thus, Balik- Scientist Dr. Guillermo A. Mendoza from the University of Illinois came to extend his expertise to the College in the field of Agroforestry specifically geo-spatial technologies. Dr. Mendoza has mentored researchers, conducted peer teachings, and trainings.

With this, the Research Development and Extension Sector has organized the Cultural and Educational Tour in Sagada which will be spearheaded by the unit on July 13, 2023.

With the ending of Dr. Mendoza's engagement, this cultural and educational tour is proposed to provide an experience of the culture of Sagada and its natural resources which the Balik Scientist' expertise is also aligned to.

III. OBJECTIVES

1. To provide an experience of the culture of Sagada and its natural resources.

IV. EXPECTED OUTPUT

1. The Balik-Scientist will be able to experience Sagada educational and cultural tour and align it to his expertise.

V. RESOURCE REQUIREMENTS:

A. Budgetary Requirements:

Item	Description	Quantity	Unit Cost	Total Cost
	July 13, 2023 (SAGADA)			
	Registration Fee	30	100.00	3,000.00
	Environmental Fee	30	100.00	3,000.00
	Access Fee	30	20.00	500.00
	Tour Guide Fee	5	1,200.00	6,000.00
	AM Snacks	30	100.00	3,000.00
	Lunch	30	200.00	6,000.00
	PM Snacks	30	100.00	3,000.00
	Dinner	30	200.00	6,000.00
			GRANDTOTAL	Php 30,500.00

TERMINAL REPORT

I. GENERAL INFORMATION

Activity: Welcome Program and Levelling Off with Dr. Guillermo Mendoza.
Date & Time of Activity: February 14, 2023 at 9:30 A.M. – 5:00 P.M.
Venue of Activity: Mini-auditorium, Admin Building, MPSPC-Tadian Campus
Proponents: RDU
Facilitator: RDU
Participants: Faculty Members of MPSPC-Tadian Campus
Budget: Php
Source of Fund:

II. NARRATIVE REPORT

The Balik Scientist Program of the Department of Science and Technology was conceived in order to help curb brain drain in the country by encouraging highly-trained overseas Filipino scientists and technologies, experts, and professionals to return to the Philippines and share their expertise for the acceleration of the scientific, agro-industrial and economic development of the country. This program serves as a tool for the strengthening of the country's scientific and technological human resources. Balik Scientists have been instrumental in providing solutions to national concerns, especially in areas where there are limited experts residing in the country thru the transfer of diverse new knowledge and expertise.

The welcome program started with the singing of the Lupang Hinirang that was conducted by Ms. Adela II A. Bantasan which was followed by a prayer led by Mr. Luther Andres I. Guinabang.

The Balik Scientist Dr. Guillermo "Gil" Mendoza, was introduced by Ms. Luzlyn M. Agwilang, Director for Research Development Unit, who gave an overview on the Balik Scientist Program by the DOST.

Dr. Mendoza hailed from Ramon, Isabela, a graduate of Bachelor of Science in Forestry at UP Los Baños and took up Doctor in Philosophy in the University of Washington. He is a professor emeritus at the University of Illinois, Urbana-Champaign, Illinois, USA. He will be with the MPSPC for the next five (5) months and this may be his last engagement as a Balik Scientist according to him. He would like to help in the capability-building and institutional strengthening of MPSPC through lectures, seminars, and hands-on trainings.

After the Balik Scientist's introduction and short message to all the faculty members of Tadian Campus, the levelling off was divided per department (Department of Agro-forestry and Forestry (DAF), Department of Engineering (DE), and Teacher Education Department (TED)).

The DAF mentioned five (5) areas that Dr. Mendoza may help them with – geographic information system (GIS), soil erosion and conservation, suitability maps, carbon sequestration, and research methods. Dr. Mendoza said that the best way to maximize the duration of his stay and to address the concerns of the department is through hands-on trainings, and lectures. For the GIS, it will be through two (2) days of hands-on training that requires the faculty members or other willing participants to have a laptop or a desktop with a strong internet connectivity with them. The first (1st) day will be allotted to the general training while the second day will be for the specific training to address the department's concerns such as the generation of suitability maps. For soil erosion and conservation, and carbon sequestration, it will be through a lecture with training context where the faculty members will be able to access a software with an open source. Lastly, the research methods will be through a day to two days lecture will be conducted. He also offered to help in the improvement of the papers of students undergoing their thesis, provide materials that they might use, or help on technical content of the researches such as the economic benefits of research, and the social outcome.

Republic of the Philippines

Mountain Province State Polytechnic College

Bontoc, Mountain Province

At 1:00 in the afternoon, the levelling off with the DE started. Dr. Mendoza shared that it has been his dream to become an engineer but despite not becoming one, he quoted that “bloom wherever you are planted”. He mentioned four (4) areas that he might

be of help with – GIS, hydrology and watershed management, soil erosion and conservation, and research. He suggested to have trainings and lectures on the said areas. Finally, he emphasized the importance of research which is the lifeblood of an academic institution to the faculty members of the DE and encouraged them to be more active in doing researches.

The last department in the levelling off was the TED, where Dr. Mendoza recognized the value of teachers and said that it is the most dignified profession for it is molding the next generation. He shared that he came from a family of teachers and a teacher himself which is why he has the utmost respect towards teachers. He also mentioned the same areas where his expertise might be useful to the department and offered to have an audience with the practice teachers and the teacher education students.

“If you want to get rich, don’t become a teacher; if you want to make a difference in the live of people, then be a teacher” was his words as he ended the levelling off.

Without further discussions, the Executive Dean encouraged the different department to conceptualize activities to maximize the expertise of Dr. Mendoza. These will then be coordinated with the RDU for scheduling for the next five (5) months.

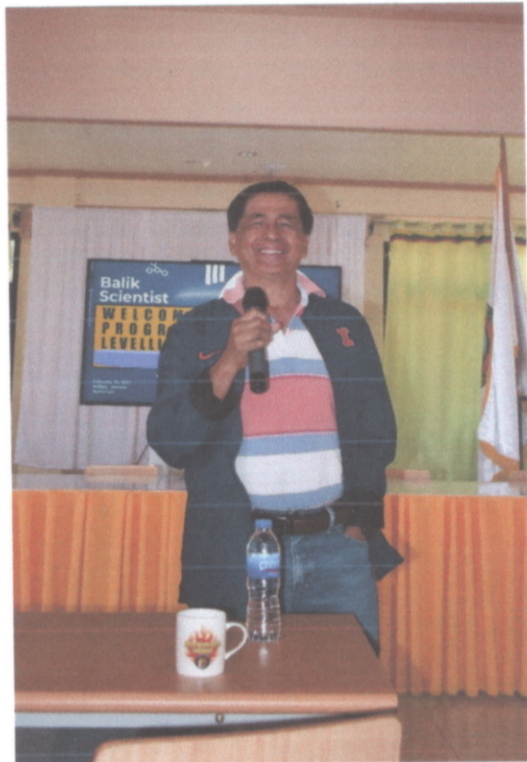

III. PHOTO DOCUMENTATION

Dr. Guillermo Mendoza delivering his message

Faculty members during Dr. Mendoza's message

Levelling Off with the Department of Agro-forestry and Forestry

Dr. Mendoza listening to the queries of the faculty members

Levelling Off with the Department of Engineering

IV. RECOMMENDATIONS

All faculty members from DAF, DE, and TED to submit activity designs, research proposals, and peer discussion schedules which needs the expertise of Dr. Mendoza and to be collaborated with the RDU to avoid conflict in the scheduling of activities.

TERMINAL REPORT

I. GENERAL INFORMATION

Activity: **DOSTv COVERAGE FOR BALIK-SCIENTIST**

Date & Time of Activity: July 5-7, 2023

Venue of Activity: MPSPC Bontoc and Tadian Campus

Budget: Php 48, 000.00

Source of Fund: Research Fund

II. NARRATIVE REPORT

Dr. Guillermo Mendoza's tenure at MPSPC as Balik Scientist was marked by active engagement and impactful contributions. He took on the role of a mentor, providing guidance to researchers and scholars. His expertise extended to peer teachings and comprehensive training sessions, offering participants insights into the intricacies of Agroforestry and geo-spatial technologies. This hands-on approach facilitated a comprehensive learning experience for both students and faculty.

Dr. Mendoza's involvement captured the attention of DOSTv, which recognized the significance of his contributions. They dedicated an episode to feature his engagement as a Forest management specialist in MPSPC. DOSTv production staff came to MPSPC to do the coverage. Interviews with participating students and faculty were shot in both campuses of Bontoc and Tadian which also featured the coffee nursery of the College. The activity enhanced the visibility of the College and its commitment to research and development.

The engagement of Dr. Mendoza through the Balik-Scientist Program proved to be a fruitful endeavor for MPSPC. It not only enriched the institution's research capacities but also offered a platform for increased exposure on a national scale. The video production that was aired on DOSTv further amplified MPSPC's prominence in the academic and scientific landscape. This engagement exemplifies the program's potential to catalyze knowledge sharing and collaborative growth, ensuring that institutions like MPSPC continue to thrive in their pursuit of excellence.

Budget: Php **55,200.00** ₱

Source of Fund: Research Fund

II. RATIONALE

To wrap up the successful engagement of Dr. Guillermo Mendoza as the Balik Scientist at Mountain Province State Polytechnic College (MPSPC), an Exit Conference will be conducted by the RDE on July 6-7, 2023. The Balik Scientist Program plays a vital role in promoting scientific research and development by inviting highly skilled Filipino scientists residing abroad to contribute their expertise and knowledge to local institutions. Dr. Guillermo Mendoza, a professor emeritus from the University of Illinois, College of Agricultural, Consumer & Environmental Sciences, recognized the significance of this program and applied to serve as a Balik Scientist at the college since February 2023.

Dr. Mendoza, with his extensive background in agricultural sciences, was hosted as a Balik Scientist for MPSPC. Throughout his engagement, he dedicated his efforts to advancing research and other initiatives at the college specifically by providing his expertise in GIS and its crucial applications. The Exit Conference will serve as an avenue for Dr. Mendoza to present his research contributions, share his experiences, and provide valuable recommendations to the academic community. On the first day of the conference, Dr. Mendoza will present his research initiatives. A panel discussion will also be hosted for the MPSPC faculty and researchers to explore how the contributions of Dr. Mendoza can contribute to the advancement of knowledge and address local challenges. On the second and third days of the conference, Dr. Mendoza will share his best practices, lessons learned, and challenges encountered during his Balik Scientist engagement. His experiences will serve as a valuable resource for future Balik Scientists and provide insights into effective research methodologies and collaboration with local researchers. A roundtable discussion will be held to facilitate a collaborative dialogue among participants, focusing on strengthening research partnerships between Balik Scientists and local researchers at MPSPC. This session will identify potential research areas for future engagements and discuss strategies to enhance knowledge transfer and capacity-building initiatives.

The Exit Conference for the Balik Scientist Engagement not only highlights the contributions of Dr. Guillermo Mendoza but also the importance of the Balik Scientist Program in fostering scientific collaborations, knowledge exchange, and advancing research and development in MPSPC as an academic community.

III. OBJECTIVES

1. To wrap up the engagement of Dr. Guillermo Mendoza as the Balik Scientist at Mountain Province State Polytechnic College (MPSPC); and,
2. To provide a platform for Dr. Mendoza to share his research experiences, research initiatives, and recommendations with the academic community.

This Exit Conference served as an avenue for Dr. Mendoza to reach out and share his journey as he presented his research contributions, shared his experiences, and provided valuable recommendations to the academic community. Dr. Edgar G. Cue, our College President also recognized the efforts and dedication of Dr. Mendoza on his contributions to faculty learnings through his initiatives on giving faculty workshops that added to the knowledge of the academe sector. While the VPRDE extended also her acknowledgement on the Balik-Scientists' engagement that made way to give ideas to faculty members on GIS and project proposals.

The Exit Conference for the Balik Scientist Engagement not only highlighted the contributions of Dr. Guillermo Mendoza but also the importance of the Balik Scientist Program in fostering scientific collaborations, knowledge exchange, and advancing research and development in MPSPC as an academic community.
